

Does loud music damage our ears?

How can we detect cosmic rays?

What can zebra fish tell us about our own biology?

What kinds of jobs do scientists really do?

**Catalyst magazine shows you how the science you learn in your lessons is used in the real world with:**

- *articles about new scientific discoveries*
- *historical breakthroughs in science*
- *how science is used in our everyday lives*
- *the kinds of jobs that scientists do*
- *a science poster in each issue*

**... and a whole lot more.**

**Catalyst**

Published 4 times per year  
(October, December, February and April).

**Ask your teacher about how you can subscribe  
to get each new issue without delay!**
